

Children are getting sicker than ever! WHY?

- Could this have anything to do with how many vaccines children receive today?
- Is Vaccination Compulsory?
- Is herd immunity a myth?
- Are vaccines really safe and effective?
- Will the HPV vaccine cause infertility?
- Is vaccinating your child costing them their health?
- Do you know what is in a vaccine?
- Why does the childhood cancer rate rise with the introduction of each vaccine?
- Can my child be excluded from childcare if they are not vaccinated?
- Can my child be excluded from school if they are not vaccinated?
- Can I lose my Government benefits if I choose not to vaccinate my child?
- What can you do to protect your child from disease naturally?
- Are you responsible enough to find out the answers to these questions?

●●● Your Vaccination Options ●●●

Come and get the facts and not just opinions!

plus, learn the latest on

●●● Sudden Infant Death Syndrome ●●●

In QLD approx. 40 babies die from SIDS each year – that's 1 every 9 days!
Find out what you can do to protect your baby that has a 100% success rate!
This information is being hidden from the general public.

Guest Speaker: Stephanie Messenger

Stephanie has been researching the vaccination issue for 30 years and SIDS for over 10 years. As a passionate advocate for allowing the body to work well naturally, she would like to share with you some of the information that is not readily available from the medical profession, Government or the media. Stephanie has raised 3 healthy children, vaccination free, and with no childhood diseases. She will help you learn how you can do this also!
